ALEXANDRE LANGA GOLDONI

PROFESSIONAL EXPERIENCE

Expresso São Miguel, Chapecó — *Intern*

MARCH 2026 - PRESENT

- Adjustment and analysis of large-scale SQL queries after database table column migration.
- Learning and support in TMS applications.
- Training in **Java**, **Python**, **NodeJS/React**, and **Delphi**.
- Creation of training materials covering business rules and logistics processes, facilitating domain knowledge transfer to new employees.
- Development of a general utilities application in Python.
- Development of **API document** standardization using .md files and Pandoc, keeping **documentation up to date** and improving its **readability**.

Concert Technologies, Belo Horizonte — *Junior Software Analyst*

JUNE 2025 - SEPTEMBER 2025

- Worked on the development and maintenance of web applications and REST APIs using **.NET** and **Angular**.
- Implemented new features and fixed bugs in an automated document generation system.
- Optimized performance and reduced computational costs through **refactoring**, achieving interface **performance improvements of up to 35%**.
- Participated in Scrum ceremonies and supported requirement analysis and technical improvement proposals.
- Experience with collaborative workflows and application of Git/GitHub best practices, including standardized commit messages, atomic commits, and frequent version control updates.

Vision System, Chapecó — *Systems Programming Support Assistant*

SEPTEMBER 2024 – JUNE 2025

- Developed RESTful APIs and web interfaces.
- Supported UX/UI improvements by proposing usability enhancements.
- Integrated applications with **PostgreSQL** and **SQL Server**, **optimizing queries** with Dapper for up to **20% better performance**.
- Produced technical documentation focused on project scalability, clarifying business rules, resolving doubts, and reducing rework.
- Performed software testing alongside the development team and participated in stakeholder alignment meetings to ensure business requirement compliance.

Infogen Sistemas, Chapecó — Trainee Programmer

FEBRUARY 2024 – AUGUST 2024

- Developed small-scale features under supervision, focusing on understanding business rules.
- Fixed simple bugs, maintained legacy code, and supported validation activities, improving communication with analysts and clients.
- Deployment of **GeneXus** implementations to production using .XPZ files and Jenkins.

EDUCATION

Unochapecó – Community University of the Region of Chapecó, Chapecó — Bachelor's Degree in Computer Science

FEBRUARY 2023 – DECEMBER 2027

Studies focused on data structures, algorithms, databases, networking, artificial intelligence, systems analysis, and computational mathematics. Practical experience with languages such as C, C++, and JavaScript, with emphasis on logical reasoning, problem-solving, and software development.

COURSES AND DEVELOPED ACTIVITIES

Entra21 — Intensive C Programming Course

APRIL 2022 – OCTOBER 2022

Activities: practical programming logic exercises; object-oriented programming projects; JSON consumption and manipulation; creation of basic HTML/CSS pages; database integration; application of coding best practices and agile methodologies in group projects.

Skills acquired: object-oriented modeling, exception handling, basic version control, and teamwork collaboration.

Wizard by Pearson — Linguistic and Proficiency (English)

APRIL 2013 – DECEMBER 2022

Activities: reading, writing, listening, and speaking classes; technical vocabulary exercises and formal communication; oral presentations and academic writing.

Skills acquired: fluency in spoken and written English, technical reading, documentation comprehension, and communication with multilingual teams.

LANGUAGES

Portuguese: Native / Proficient

English: Advanced — technical reading, spoken and written communication in professional environments

ADDITIONAL INFORMATION

Focused on opportunities involving C#, TypeScript, Java, React, and Python development.

Strong interest in software analysis, including code review, software architecture, and system impact evaluation.

Additional courses and certifications related to these technologies can be found on my LinkedIn profile.
